

Efrem Wilkerson

Falls Church, VA | efremwilkerson@gmail.com

Education

Florida State University, Tallahassee, FL

Bachelor of Science in Computer Science, May 2021

- Honors: Phi Theta Kappa Honor Society, Dean's List
- Relevant Coursework: Data Structures and Algorithm Analysis, Object-Oriented Programming, Network System Administration, Cybercrime Detection and Forensics, Computer Security Fundamentals

Technical Proficiencies

- Programming Languages: C++, Java, Python, JavaScript, HTML
- Operating Systems: Windows, macOS, Unix, Linux
- Frameworks & Tools: React, Visual Studio, GitLab, PowerShell
- Technical Knowledge: Object-Oriented Programming, Data Structures and Algorithms, Cybersecurity Principles, Amazon Web Services (AWS), Software Development Life Cycle (SDLC), Agile Development
- Certifications: CompTIA Security+ (August 2022)

Experience

Department of Defense, Defense Intelligence Agency – Washington, DC Jan 2025 – Present *Software Developer*

- Design, develop, and maintain software applications using JavaScript, Java, and React to support secure DoD systems
- Enhance system security by contributing to hardening initiatives and ensuring compliance with NIST and DoD cybersecurity frameworks
- Improve performance of legacy applications through algorithm optimisation and code refactoring
- Collaborate with senior engineers to debug, test, and deploy software updates, reducing downtime and increasing system reliability
- Participate in Agile sprints, contributing to planning, backlog grooming, and cross-team integration efforts

Department of Defense, U.S. Air Force – Warner Robins, GA May 2022 – January 2025
Software/Cybersecurity Engineer

- Led projects that reduced system vulnerabilities by 30% through implementation of enhanced security protocols and automated monitoring tools
- Developed a secure software application enabling secure file sharing and communication across the organization
- Managed new-hire preparation for certification exams, achieving a 95% first-attempt pass rate through tailored training and mentorship
- Conducted penetration testing, vulnerability assessments, and secure code reviews to maintain compliance with Risk Management Framework cybersecurity standards
- Applied Agile methodologies to deliver scalable solutions, improving system performance and

reliability in mission-critical environments
